

# Improve Your Cat Photo Skills

## Focus on Your Cat's Eye(s)

People automatically look at the eyes first. Make yours sharp and people forgive you a lot!

## Try a New Angle

Be brave, be crazy! Lie on the floor, tilt your camera upwards. Don't just stand there, get busy!

## Use Continuous or Burst Mode

This takes a bundle of shots super quickly. You will find an amazing shot amongst them!

## Be Patient

It may take your cat time to decide to co-operate. Sometimes bribery works so have treats ready. Get close for super portraits.
